

CCTV INSTALLATION AND MAINTENANC PROJECT AT **RAJ BHAVAN HYDERABAD'S STAFF QUARTERS AND COMMUNITY HALL**

Brihaspathi Technologies successfully completed the prestigious CCTV installation and maintenance project at Raj Bhavan Hyderabad's Staff Quarters and Community Hall.

Truly, leadership is not a position or title, it is action and example. Brihaspathi Technologies Hyderabad, the pioneer and leading CCTV services provider has another jewel in its crown of achievements.

At the prestigious Raj Bhavan Hyderabad, Brihaspathi Technologies took to fruition the CCTV installation and maintenance project. This remarkably coincides and continues the focused efforts of Shri Kalvakuntla Chandrashekar Rao, CM of Telangana to modernize and provide state of art facilities to the staff at Raj Bhavan Hyderabad.

Brihaspathi Technologies has been in the forefront of providing innovative and competitively priced CCTV systems across India. The company completed scores of CCTV installation and maintenance projects in public and private sector, gated communities indoor places and outdoor locations.

The installation and maintenance of CCTV systems at Raj Bhavan Hyderabad's Staff Quarters means to provide high-end safety and security to the residents of the 185 flats. With A, B and C type of staff quarters the quarters were completed in G+ 5 formats on 2.70 acres.

This project was definitely a challenge for all personnel involved in the CCTV installation. The placement of cameras at the staff quarters was not an easy task, with - minimum use of cameras the demand was for extensive, strategic and sensible coverage. With prompt and responsive support from Raj Bhavan's officials and caretakers the CCTV installation and maintenance project could be completed on-time

CCTV systems were also installed at Raj Bhavan Hyderabad's Community Hall. 1 PTZ Camera and 17 Bullet Cameras of Samsung make were installed for this purpose. All the surveillance cameras installed at Community Hall were integrated to existing control room at staff quarters. Significantly, 200 meters of OFC cable was laid underground from community hall to the control room.

The latest and innovative technology driven by experienced technical personnel helped us to complete the prestigious Raj Bhavan Hyderabad's CCTV project. To provide an extra safety feature to the entire CCTV system here, an optical fibre cable was laid underground through a CVPC conduit pipe.

Of significance is the strategic placement of surveillance cameras within the Community Hall. All the 18 cameras (1 ptz and 17 bullet cameras) meant to assure high safety and security to dignitaries, staff, media and public present in the Community Hall.

The new Staff Quarters and Community Hall project was designed as per the Green Building concept with provision for green cover of 20 percent of total area. Brihaspathi Technologies CCTV installation and maintenance project at Raj Bhavan definitely reinforces and takes this noble and one-of-its-kind green mission further.
