

Incredible, Innovative & Impactful:

# COVIPRO

the Multifunctional  
COVID-19 Preventive System

## About Covipro

For a healthy life, prevention is always better than cure. However, prevention can be made possible only by the right knowledge and awareness of the ailment. COVID-19 (Corona Virus Disease 2019) pandemic has come as an unparalleled curse of this century. This virus spread within no time, and spared no human, region, nation and the world. The focused efforts of humans to quell this pandemic were met with mass vaccination programs on a global scale. However, the importance of prevention and awareness was found to precede efforts at treating those affected by Corona Virus.

## Unique all-in-one kiosk to prevent Covid-19

© Fri, Sep 11, 2020 8:27 IST | 10 Views

HYDERABAD, SEP 11 : Hyderabad-based Brihaspathi Technologies has developed a unique kiosk-based solution to prevent coronavirus, and it is being used at the Telangana Assembly at its ongoing session.

COVIPRO is an all-in-one kiosk providing face recognition, realtime temperature recording, automatic hand sanitiser and UV disinfection of various articles.

The company has installed 18 COVIPRO devices at the Telangana Assembly for use by the legislators during the ongoing session.

Health Minister E Rajender, Industry Minister K.T. Rama Rao and other ministers and legislators were seen using the kiosk. They were all praise for the unique features of the device.

COVIPRO has designed and developed the in Hyderabad as part of Make in India project. The firm's unit at Cherlapally can produce 400 kiosks per day.

COVIPRO has a micro SD slot for storage and one can even install their operating system too. It uses regular 230 volt AC power. The LED monitor will help display important information or even advertisements. COVIPRO can be used as an information kiosk in the post-corona scenario.

"Corona has brought so many changes in our daily lives. Going to a public place has become a major challenge. Places like metro stations, bus stations, railway stations, offices, etc. need to be monitored and disinfected every person, along with the articles carried. It's a herculean challenge as one needs to install so many machines for each function. COVIPRO is the answer for all these problems," said Rajeshwar Tapolu, Managing Director, Brihaspathi Technologies.

The company has priced COVIPRO at ₹45,000 and will be making it available across India in 30 days. It has a target of selling 10,000 devices in the next 100 days.

# Uses of Covipro

In the direction of preventing the spread of COVID-19, scientists and technocrats has had their remarkable contributions, globally. Brihaspathi Technologies' Hyderabad, the pioneer in installation and maintenance of surveillance systems in India has launched its flagship COVID prevention product, COVIPRO. This indigenous, innovative and reliable technology product offers a complete multifunctional COVID preventive system. COVIPRO prevents the spread of the virus by timely checking of each individual's temperature, dispenses mist sanitizer, and provides for contactless UV disinfection of cell phones, office files, lap-tops and all other items of everyday use.

స్వీకరణ పోచారం క్రీనివాసరెడ్డి సమక్షంలో అనంబ్లిల్ ఏర్పాటు చేసిన ఆటోమేటిక్ హ్యాండ్ సానిటైజర్ లో తన బాడి టంపెరేచర్ ని రాష్ట్ర పంచాయతీరాజ్, గ్రామీణాభివృద్ధి, గ్రామీణ మంచినీటి శాఖ మంత్రి ఎంబెల్లి దయాకర్ రావు గురువారం పరీక్షించుకున్నారు. ఈ సందర్భంగా స్వీకరణ మంత్రికి మేక ఇన్ ఇండియా రూపొందించిన కేవిప్రో మిషన్ ప్రత్యేకతలను వివరించారు. హ్యాండ్ సానిటైజర్ తోపాటు, డిస్పెన్సర్, గ్యాడ్జెట్స్ ని, ఇతర వస్తువులను టుబ్లె పరచడంతోపాటు, వైతి వ్యక్తి సమాచారాన్ని... COVIPRO also works as an information kiosk that is enabled by on a cloud based platform. This device capably allows institutions, offices and businesses to track the number of visitors, records normal and abnormal temperatures of individuals, and sends updates to the central control room. Significantly, the photograph and temperature of each individual/ visitor is recorded and reported in real-time. This helps the COVID-19 supervising team to act and separate all individuals with symptoms of COVID-19, and refer them for further testing.

With 50+ COVIPRO devices already installed, Brihaspathi Technologies has the capability and capacity to produce 400 COVIPRO devices per day. Significantly, this device utilizes the regular 230 volt AC power. The 18.5" LED monitor not only displays important information, but also allows for on-screen advertisements.

## Unique all-in-one kiosk to prevent Covid-19

GREATANDHRA | SEP 11, 2020

Hyderabad-based Brihaspathi Technologies has developed a unique kiosk-based solution to prevent coronavirus, and it is being used at the Telangana Assembly at its ongoing session.

COVIPRO is an all-in-one kiosk providing face recognition, realtime temperature recording, automatic hand sanitiser and UV disinfection of various articles.

The company has installed 18 COVIPRO devices at the Telangana Assembly for use by the legislators during the ongoing session.

Health Minister E. Rajender, Industry Minister K. T. Rama Rao and other ministers and legislators were seen using the kiosk. They were all praise for the unique features of the device.

COVIPRO has designed and developed the in Hyderabad as part of Make in India project. The firm's unit at Cherlapally can produce 400 kiosks per day.

COVIPRO has a micro SD slot for storage and one can even install their operating system too. It uses regular 230 volt AC power. The LED monitor will help display important information or even advertisements. COVIPRO can be used as an information kiosk in the post-corona scenario.

"Corona has brought so many changes in our daily lives. Going to a public place has become a major challenge. Places like metro stations, bus stations, railway stations, offices, etc. needs to be monitored and disinfect every person, along with the articles carried. It's a herculean challenge as one needs to install so many machines for each function. COVIPRO is the answer for all these problems," said Rajashekar Papolu, Managing Director, Brihaspathi Technologies.

The company has priced COVIPRO at Rs 45,000 and will be making it available across India in 30 days. It has a target of selling 10,000 devices

## Benefits of Covipro

“COVIPRO offers a holistic solution and stops the spread of COVID-19. It is indispensable for corporate offices, shopping malls, hotels and hospitals. Significantly, by separating the infected from the non-infected COVIPRO helps organizations to optimize their health and safety protocols, and creates a healthy, happy and productive environment. COVIPRO is already in use in public and private sector. COVIPRO was successfully installed at Telangana State Assembly & Council, Telangana Roads & Buildings Department, Telangana DIG and Hyderabad Commissioner Offices, Telangana Secretariat, and Gymkhana Grounds Secunderabad. With the corporate, COVIPRO has a vibrant presence at ARCUTHERM Pvt Ltd, and The India Cements Ltd.”

**Brihaspathi Technologies** plans to offer its innovative and totally Make in India COVIPRO, the COVID prevention device to metro stations, railway stations, public and private offices. With each COVIPRO device priced at only 45000 INR (negotiable), offices and business establishments across India can now achieve total prevention of COVID. And, with an ambitious target to install 10,000 devices in the next 100 days, Brihaspathi Technologies marches ahead as the most cherishable and endearing Make in India Company.

When this device is not utilized for COVID prevention checks, it can be used for on-screen display of advertisements, and for running COVID awareness programs. This is truly remarkable, and Brihaspathi Technologies deserves a huge commendation for innovating and launching the first-ever and all-in-one COVID prevention device in India.
